DETAILED ACTION

This is a response to the Applicant's amendment submitted on Aug 18, 2005. In virtue of this amendment, claim 5 is added. Thus, claims 1-5 are now remaining active in the instant application.

Allowable Subject Matter

1. The indicated allowability of claims 2 is withdrawn in view of the newly discovered reference(s) to Kimura (US 2004/0089862). Rejections based on the newly cited reference(s) follow.

Response to Arguments

2. Applicant's arguments with respect to claims 1-5 have been considered but are moot in view of the new ground(s) of rejection.

Drawings

3. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the "plurality of pixel" in claim 1 must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the

Art Unit: 2821

drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Objections

4. Claims 3-4 are objected to because of the following informalities:

Claims 3-4, line 5, "the high concentration region and the channel" change to - - the high concentration region and the channel of the P type impurity region- -.

Appropriate correction is required.

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the

Art Unit: 2821

reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

6. Claims 1-2 and 5 are rejected under 35 U.S.C. 102(e) as being anticipated by Kimura (US 2004/0089862).

Regarding claims 1-2 and 5, Kimura disclose an electroluminescent display device in Fig. 4 and 6 comprising:

- a plurality of pixels (Fig. 6); a substrate (20); a pixel selecting transistor (13); an electroluminescent (15); a driving transistor (21) comprising a channel of P type and a lightly-doped-drain structure (Fig. 4) (Abstract); a gate electrode (22), a P type impurity region (26 and 27) and a region of no doped impurities is disposed between the gate electrode (22) and the P type impurity region (26 and 27) (Fig. 4) (Page 3, Col. 2, Line 15).

Allowable Subject Matter

7. Claims 3 and 4 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Regarding claims 3 and 4, the references of the prior art of record fails to teach or suggest the combination of the limitation as set forth in the claims: a high concentration region containing a P-type impurity with a concentration of $1 \times 10^{20}/\text{cc}$ or more and being in contact with an electrode, and a low concentration region containing a P-type impurity with a concentration of $1 \times 10^{18}/\text{cc}$ or less and disposed between the high concentration region and the channel of the P type impurity region.

Art Unit: 2821

Citation of relevant prior art

Prior art Kimura (US 2003/0090481) disclose display device and method for driving the same.

Prior art Yamazaki et al (USP. 6,876,145) disclose organic electroluminescent display device.
